Apartment 50: Paper 008

AuthorityEffect: None. This is fictional examination staging, not a historical quotation or a source of mathematical authority.

Landau points at the declared carrier. Woland asks which claim its checker can establish. Behemoth asks for the smallest valid near miss. Their task in this companion is **round trips and semantic conservativity**.

Begin with the study guide and instructor key, then attempt the quiz without the key. A lower-case wire token names a role only after its interpretation is declared. Arrows sketch graph edges; they do not automatically attach higher-dimensional cells. A receipt verifies its stated finite check and grants no authority to extend Genesis or make a physical claim.

The examiner's standard is a concrete calculation, an explicit counterexample, or a source-bound missing obligation. The manuscript source reading governs the answer.
