Apartment 50: Paper 003

AuthorityEffect: None. This is fictional examination staging, not a historical quotation or a source of mathematical authority.

Landau points at the declared carrier. Woland asks which claim its checker can establish. Behemoth asks for the smallest valid near miss. Their task in this companion is **detector admission and valid near misses**.

Begin with the study guide, then attempt the quiz before opening the separate instructor key. The eight levels are an original teaching sequence, not a historical Landau examination. Declare the proposal's carrier, route, predicate, and action before treating a pattern as a defect. A receipt verifies its stated finite check and grants no authority to extend Genesis or make a physical claim.

The examiner's standard is a concrete calculation, an explicit counterexample, or a source-bound missing obligation. The manuscript source reading governs the answer.
